```java
import product.a.Product;

public class BookProduct extends Product {

    private String author;

    private String publisher;

    public BookProduct(int productId, String name, float price, String author, String publisher) {

        super(productId, name, price);

        this.author = author;

        this.publisher = publisher;

    }

    public String getAuthor() {

        return author;

    }

    public void setAuthor(String author) {

        this.author = author;

    }

    public String getPublisher() {

        return publisher;

    }

}
```

```java
    public void setPublisher(String publisher) {

        this.publisher = publisher;

    }

}
```
